receiving data that specifies a first form of a component word;
locating, within said compound word, a second form of said component word that differs from said first form of said component word; and
displaying said compound word with said second form of said component word visibly distinguished from the remainder of said compound word,
wherein the steps of receiving, locating and displaying are performed ~~by~~ with a search engine executing ~~in~~ on a computer system, and
wherein said compound word contains two or more component words.

Claim 4. A computer-implemented method of determining a position of a component word within a compound word, the method comprising:
determining a first stem word associated with said compound word;
determining a second stem word associated with said compound word;

Art Unit: 3715

based on a comparison between letters in said first stem word and said compound word, determining a first starting position;

based on a comparison between letters in said second stem word and said compound word, determining a second starting position;

determining, based on said first starting position and said second starting position, a starting position associated with said first stem word;

determining, based on said first starting position and said second starting position, an ending position associated with said first stem word; and

displaying said compound word with letters at and between said starting position associated with said first stem word and said ending position associated with said first stem word visibly distinguished from the remainder of said compound word,

wherein the steps of determining and displaying are performed with a search engine executing on a computer system, and

wherein said compound word contains two or more component words.

Claim 8. A non-transitory computer-readable storage medium carrying one or more sequences of instructions which, when executed by one or more processors on a computer system, causes the one or more processors to carry out the steps of:

receiving data that specifies a first form of a component word;

locating, within said compound word, a second form of said component word that differs from said first form of said component word; and

Art Unit: 3715

displaying said compound word with said second form of said component word
visibly distinguished from the remainder of said compound word,
wherein said compound word contains two or more component words.

Claim 9. The non-transitory computer-readable storage medium of Claim 8, wherein
said second form of said component word is a superlative form of said first form
of said component word, and wherein said compound word is a non-English
language word.

Claim 10. The non-transitory computer-readable storage medium of claim 8, wherein
said second form of said component word does not contain said first form of said
component word.

Claim 11. A non-transitory computer-readable storage medium carrying one or more
sequences of instructions which, when executed by one or more processors on a
computer system, causes the one or more processors to carry out the steps of:
determining a first stem word associated with said compound word;
determining a second stem word associated with said compound word;
based on a comparison between letters in said first stem word and said
compound word, determining a first starting position;
based on a comparison between letters in said second stem word and said
compound word, determining a second starting position;
determining, based on said first starting position and said second starting
position, a starting position associated with said first stem word;

Art Unit: 3715

determining, based on said first starting position and said second starting position, an ending position associated with said first stem word; and displaying said compound word with letters at and between said starting position associated with said first stem word and said ending position associated with said first stem word visibly distinguished from the remainder of said compound word,

wherein said compound word contains two or more component words.

Claim 12. The non-transitory computer-readable storage medium of Claim 11, wherein determining said first starting position comprises:

determining, for a first sequence of letters in said compound word, a first score based on how many letters in said first sequence match letters in said first stem word;

determining, for a second sequence of letters in said compound word, a second score based on how many letters in said second sequence match letters in said first stem word; and

determining said first starting position based on said first score and said second score.

Claim 13. The non-transitory computer-readable storage medium of Claim 12, wherein determining said second starting position comprises:

determining, for a third sequence of letters in said compound word, a third score based on how many letters in said third sequence match letters in said second stem word;

Art Unit: 3715

determining, for a fourth sequence of letters in said compound word, a fourth score based on how many letters in said fourth sequence match letters in said second stem word; and
determining said second starting position based on said third score and said fourth score.

For independent claims 4 & 11, None of the cited patents or publications used singly or in combination teach determining a first stem word associated with said compound word; determining a second stem word associated with said compound word; and displaying said compound word with letters at and between said starting position associated with said first stem word and said ending position associated with said first stem word visibly distinguished from the remainder of said compound word. Further, the examiner believes that the applicant's arguments are persuasive and are deemed additional reasons for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
